

Mevesi and Health Business Systems Announce Integration to Deliver Powerful Business Intelligence Tools for Pharmacy!

FOR IMMEDIATE RELEASE

May 1, 2012 Orlando, FL - Mevesi, Inc. announces the integration between Mevesi Rx and Health Business Systems (HBS), an SXC Company, RxAXIS® pharmacy software system. This powerful partnership provides pharmacies with business intelligence about revenue, margins, store locations, products, and market performance. It also enables independent pharmacy to effectively share critical information across their organization and communicate with patients like never before.

Mevesi's easy to use "point and click" interface allows pharmacies immediate visibility to key business metrics and performance indicators. Pharmacy management can immediately identify margin issues or review specific sales performance and then drill down to the transactional level to make data driven decisions about their business, a specific store location or even which generic drugs to keep on the shelf. Simple user defined filtering capability allows owners and managers to see what they want to see, when they want to see it. Simply login to the web based application and for the first time see your pharmacy business from a transactional point of view and begin to be intelligent about how you run your business. Some users may experience revenue and gross margin increases. Just a 2% gross margin increase across any pharmacy organization can mean big profit increases. Data and Knowledge are power and Mevesi places both at your fingertips, fast!

"HBS is committed in presenting our clients with the best options the industry has to offer, and the Mevesi platform allows HBS to deliver a business intelligence tool for pharmacy – an extension of the RxAXIS pharmacy system – that's easy to use and simplifies user access to their pharmacy data," said Martin Spellman, HBS Director of Implementation and Sales. "The need for powerful data for the pharmacy is an ideal fit for those who are looking for critical information for operating decisions."

Mevesi CEO, Omar Sosa, believes the partnership grew from common interests. "Our organizations share the same vision in offering pharmacies cost effective business intelligence solutions that provide operational performance, revenue trends, and drug margin analysis," said Sosa. "The market has never been more competitive and these services, which traditionally have only been available to large national chain pharmacies, will become the new standard for independent pharmacy; a way for the independents to fight back against margin erosion, cost increases and customer attrition to maintain their edge!"

Mevesi Rx suite of services include:

Mevesi•Rx® View provides insights into the business, stores, products or market performance while users are enabled to effectively share critical information across the organization.

- Easy to use report library
- Key performance and business dashboards
- Margin, drug, payer and physician scorecards.
- 100% visibility and flexibility for unlimited data filtering

Mevesi•Rx® Connect creates and disseminates NCPDP compliant custom reports and data files to an unlimited number of parties such as:

- Owners, executives, managers and pharmacists

- Drug manufacturers
- Patient assist programs (PAP)
- Government entities and other third parties.

Mevesi•Rx® Messenger is an automated Interactive Voice, eMail, and SMS Text clinical solution that can generate thousands of interactions like:

- Provide patients with reminders and notifications
- Physician automated notifications
- Perform clinical management assessments
- Connect with patients through various marketing and promotional campaigns
