

Dear Keystone Member:

We understand that in today's market conditions; you need to know what's going on while running your business at the same time. Add to that competition from mail order pharmacies and large retail chains, managing an independent pharmacy has become a unique challenge.

To give themselves a competitive edge, some of our members have started to use MevesioRx®, a business intelligence solution that partners with existing pharmacy software systems to allow analysis of important pharmacy data, the rapid creation of reports, and enhanced customer communication. Our Beta test store has already seen results from his store that showed very good results in his Return of Investment.

We are continually working to offer the lowest prices available from vendors, and are pleased to announce our partnership with Mevesi Inc. And, as a member of Keystone Pharmacy Alliance, you can sign up for Mevesi products at a preferred rate. To find out more about Mevesi, I encourage you to sign up for a free private demo at <http://www.mevesi.com/keystonedemo>

Best Regards,
